

# Hi, Thank You for purchasing your Myhoody

Caring for your microfibre hoody is easy when you follow our care instructions.

## Washing care

Wash separately before use.

Myhoody is best washed in cold water and separate your light colours from dark colours. Hang out to dry in a sunny spot on the line. Pop a Myhoody into a tumble dryer (only on a cool setting, for about 20 mins). Great in the colder months to dry quickly. Use mild liquid detergent, as soap powders can leave residue on fabrics. Try not to wash your microfibre hoody with cotton towels.

## Pop down a picnic rug or towel in the summer months

It's a good idea to pop a picnic blanket or towel down when sitting near dry grass or twigs.

Soaking a wet hoody if you do sit on dry grass can be solved by a good shake, then a soak in cold water & massage out any grass when your hoody is wet.
